<ul style="list-style-type: none"> <li>The teacher's explanation of the course content is very detailed. I can easily understand every step of each question.</li> <li>Mr Tribone was my favorite teacher this semester. He was always super helpful and overall just a nice person.</li> <li>Professor Tribone always helps not only me but also every students when we confuse to solve problems. I really appreciate to teach from basic skills.</li> <li>He was a fantastic teacher, and I would love to have him as my instructor for calculus 2 if that is possible.</li> <li>Great class. The professor taught better than any math class I have had thus far.</li> </ul>	

16 - How was this course accessible and inclusive of diverse groups?	
<b>Response Rate</b>	5/24 (20.83%)
<ul style="list-style-type: none"> <li>The rate of teaching is properly. Teacher will leave plenty of time to help these students who are not yet understand the class content.</li> <li>I don't know I didn't pay attention to that, I was just focused on learning the math.</li> <li>Um I don't really understand this question... It was a math class; I don't really know how to explain it past that. Like everyone in the course had taken the necessary prerequisites to do well so yeah.</li> <li>Yes</li> <li>It was a really nicely planned course, I think that it was really easily understandable.</li> </ul>	

17 - Describe when you were most engaged, excited, and involved as a learner in this course.	
<b>Response Rate</b>	6/24 (25%)
<ul style="list-style-type: none"> <li>In the recitation part. We are able to exert what we learn to solve the problem sheets.</li> <li>When we would work on packets of practice problem I was able to see what types of problems I was expected to know for quizzes or exams. I was also able to get good feedback and get help with the problems I did not understand.</li> <li>Probably during the derivative unit, because I did really well then.</li> <li>I mean I love math... so, like basically everything in this course excited me and was engaging. I really like doing the problems and learning the new concepts and principles, as well as reviewing them later and being able to demonstrate what I learned.</li> <li>Lectures</li> <li>I think that the recitation periods were really engaging, as it gave us the most time to just work on different problems.</li> </ul>	

18 - Describe when you were most distanced, disengaged, and uninvolved as a learner in this course.	
<b>Response Rate</b>	5/24 (20.83%)
<ul style="list-style-type: none"> <li>When the exam result is released and I found I did the mistake that I shouldn't have.</li> <li>During the unit before right now, but I wasn't any of those things listed above, it was just difficult.</li> <li>I mean I don't like tests, but I love math so don't think there was any particular time in which I was "distanced, disengaged, or uninvolved".</li> <li>None</li> <li>The lectures are usually pretty uninvolved, however that is to be expected since it's lecture, but the recitation makes up for it in my opinion.</li> </ul>
